The Magnolia Tract!

On West Washington Street, at the City Line.

THE HELLMAN TWO-HORSE STREET CAR LINE IS UNDER CON-
tract to be extended at once from the present terminus, at Figueroa on Washington st., to a point in front of these lots. This is decidedly the best street-car line in the city, and property along its extension will go booming up, from fifty to one hundred per cent., as it has elsewhere.

on the building of a new or the extension of an old street-car line.
Washington street is the broadest and finest avenue in the city, in a south westerly direction and is the main thoroughfare to Santa Monica and the sea. Four street car lines built and three others projected in a south westerly course, point to the fact that, Los Angeles is making a grand and rapid growth. In ten years' time will be almost if not quite a continental city, grasping hands with the old and new cities by the briny deep.
If you want property for a home, or where the increase of values will be the greatest, buy right in the midst of the great current of the city's growth—on WEST WASHINGTON ST. We are now offering lots in this beautiful MAGNOLIA TRACT, at first prices that must soon double in value.
The best of soil, and pure, soft water is had in wells at reasonable depth. TERMS, only 1/4 cash, balance in six and twelve months.

OUR NEIGHBORS.

Pasadena.
COURT WORK.—DECEMBER 21.—(Correspondence of THE TIMES.) The directors of the new subdivision across the Arroyo Seco, on the Linda Vista Rancho, will close the plans this week for the new bridge.

There is a \$4,000 sale on the real-estate boards which will probably be consummated during the week.

Seventeen cases were up before the City Court today. One was on a charge of burglary near Sierra Madre; plaintiff, remainder on "601" to issue their "mandate No. 2."

The Presbyterian Society will hold appropriate exercises in Williams' Hall Christmas eve.

The following students returned from school at Berkeley today: Miss Elma Ball, Miss Maria Visser, Edward Mosher, T. A. Allen, Charles Turner, Howard Conger, Harlow Maynard, Clifford Barnes. There were about twenty students coming down, the remainder going to Los Angeles and Riverside.

IT IS NO GO.

Secretary Graham Must Work for Nothing and Board Himself.

The suit of A. F. Moeck against James C. Kays, City Treasurer, and F. S. Graham, commenced on the 31st of August, 1886, was yesterday virtually decided by Judge Brannon on the demurrer of defendants. It will be remembered that on the 23rd of last July, the Board of Education of this city made an order for a warrant on J. C. Kays, City Treasurer, for \$300, payable to F. S. Graham, for services rendered by him as secretary from the 1st of January to July 1, 1886. Mr. Moeck applied for an injunction to restrain the City Treasurer from paying the \$300 to Mr. Graham—the complaint stating that Moeck was a taxpayer and resident, that he was interested in the disbursement of school moneys, and that the board had no legal right to pass such order or to issue said warrant to said Graham. The defendants, Kays and Graham, interposed a demurrer to the plaintiff's complaint, and the case was argued and submitted. Judge Brannon held that the demurrer should be overruled, and Mr. Kays restrained from paying Mr. Graham as secretary. In the course of his decision the learned judge intimated that the act of the Legislature provided for the election of five members of the Board of Education, who by duty it was to choose from their number a president and secretary, and the same law provides that school directors must serve without compensation. The defendants, Graham and Kays, contended on behalf of their common school system.

So Mr. Kays cannot pay, and Mr. Graham will not receive, that little \$300 a month. As the labor involved takes nearly a man's whole time there evidently will be no rush for the unpaid and thankless position. Indeed, it will be a wonder if his duties are performed at all.

Maj. Henderson in Santa Barbara.

(Independent, Dec. 17.)
The famous "Drummer Boy of the Rappahannock" met with an enthusiastic welcome in Santa Barbara. The rattle and the crash of the silver drum, the gift of Horace Greeley, awoke the wildest enthusiasm. It was not alone the battle-scarred veteran who listened eagerly to the old army march, but the children of to-day in California, who have no knowledge of the war except as gleaned from the pages of history.

THE TERM CATARRH IS AP-

plied to a peculiar disorder of the nostrils and adjacent parts, which prevails to an alarming extent and is productive of very serious consequences.

The most prominent and characteristic feature is a morbid discharge from the head, varying in its nature at different times. In some there is an almost constant flow of clear, acid fluid, but often an offensive, purulent or mucopurulent, greenish-yellow matter is secreted, which accumulates in the nostrils or drops into the throat, necessitating its frequent removal by blowing the nose or expectoration, and often by both processes. Sometimes patients feel as though their whole head was in a state of rotteness, so great is the amount of matter discharged and so fetid is its odor. The patient is greatly annoyed by the constant dripping into the throat of the morbid matter from the head, and as a recurrent position naturally favors the discharge, his rest is frequently disturbed from this cause. Many sufferers are obliged to lie with the head very much elevated in order to sleep with some degree of comfort.

In others a tough, viscid and offensive phlegm collects behind and above the soft palate, in the passage between the throat and head, adhering to the parts with gluish tenacity. Its lodgment embarrasses respiration and creates a sensation of irritation and uneasiness in the affected locality, which gives rise to a constant and almost irresistible desire to relieve the discomfort by drawing the mucus into the throat, so as to eject it by the mouth.

This practice, popularly known as "sneezing," is characteristic of catarrh, and proves as embarrassing to one affected as it is disagreeable to those around him.

Again, the offensive matter hardens and deposits itself on the membrane in the shape of dry, hard concretions, which are discharged by way of the nostrils or throat in lumps or fragments of a deep greenish color. In some cases these concretions accumulate to such an extent as to form a regular plug in the nostril, which obstructs breathing and produces serious discomfort. So firmly do these concretions adhere to the point of attachment, that their removal usually requires the most violent efforts, and infrequently they have to be torn from the membrane, leaving a raw, bleeding surface, and in some cases the cast presents a tubular appearance, being of exact shape of the nasal cavity, and in some cases the cast presents a tubular appearance, being of exact shape of the nasal cavity, and in some cases the cast presents a tubular appearance, being of exact shape of the nasal cavity.
